Subject
WarmtelinQ work on the Kempstraat: start after the summer of 2024

Dear resident/businessperson,

After the summer of 2024, Heijmans will be starting work near you. We'll be laying heat pipelines underground. These are two pipes side by side: an outward pipe and a return pipe. This is the WarmtelinQ project. The work will be starting in October and is expected to carry on until spring 2025. In the coming period we'll already be doing some preparations, including removing some trees. This letter tells you more about the work, and what you can expect because of it.

You've previously received a letter from us. The schedule stated in that letter has changed.
In our first letter we said we'd first be working on the Kempstraat and then on the De la Reyweg, but because of other projects in the same area the order of our work has been reversed. We'll now first lay the pipeline in De la Reyweg, from the Veluweplein to the junction on the Kempstraat (January-October 2024), then we'll start work in the Kempstraat (October 2024-early 2025).

With this new schedule we won't be carrying out any work on the De la Reyweg after October.
After October 2024 the De la Reyweg will be fully open again to traffic in both directions. Bus 26 can also resume its own route on the De la Reyweg earlier than planned. In October you can again board the bus on De la Reyweg.

We'll be carrying out preparatory work in the Kempstraat this spring.
Space is needed to lay the heat pipeline, both above and below ground. That's why we'll be felling and pruning trees and bushes: ten of them in the Kempstraat in the first stage. We'll do this in the period from 12 to 23 February, before the breeding season begins. We'll return after the summer to cut down and prune a few more trees and shrubs. You'll probably not notice much because of this work. No diversions will be needed either.

Trees cannot be planted on top of the pipeline: that's why we'll sometimes replant trees in other places. In doing so we'll try to ensure that the new trees are as similar as possible to those we previously cut down. The local council has given permission (a permit) for this work. You can find more information about (replanting) greenery at warmtelinq.nl/groen.

For more information, go to warmtelinq.nl/denhaag
Do you have any questions, concerns or tips for us? Then go to www.warmtelinq.nl/denhaag. You can also call or text us on 06 3948 9911. Our email address is info@warmtelinq.nl.

Follow the "WarmtelinQ The Hague" project on the BouwApp.
We'd like to keep you informed via the BouwApp. Download the app from the Playstore (Android) or App Store (Apple), or scan the QR code.

Around the summertime we'll inform you about the work we'll be carrying out on the Kempstraat after the summer.

Best regards,

Rinaldo de Lange
Heijmans Environment Manager
