Dear resident,

On behalf of WarmtelinQ, Heijmans is working in your area. We'll be laying heat pipelines underground: two pipes side by side (an outward pipe and a return pipe). We'll lay the pipeline under the carriageway of the De la Reyweg towards the Veluweplein. Our work will continue until the autumn of 2024. This can cause vibrations and noise. We understand that you may be inconvenienced by this. In this letter we'd like to give you an update on the work and what it might mean for you.

Sheet-pile walls are needed: we've installed these in recent weeks.
We'll be connecting new sections of the heat pipeline to the pipes we previously brought underground by drilling. From this starting point we'll now continue by creating an expansion loop. This means that we'll lay the heat pipe in bends so that it'll have room to expand when hot water flows through it. This requires a deep trench: an excavated area of ground in which we'll be working and laying the heat pipe. To keep this trench safe we'll use long sheet-pile walls.

Scan the QR code for a step-by-step video.

How long will the work last?
The vibration work went on until last week. From now on we'll be digging the trench and laying the heat pipe underground. Because of our digging machines and pumps you may notice some of this, although it will cause less disruption than installing the sheet piling. We're now in the process of excavating, using digging machines. This requires pumps to pump away groundwater. This is called ground drainage. You may notice some noise from this, although the pumps we use are electric, so they make as little noise as possible. We work on weekdays from 7AM to 5PM. If we have to deviate from these working hours we'll let you know.

We'll be working on the De la Reyweg until the autumn, when we'll be completely finished on De la Reyweg. Then we'll continue on the Kempstraat. This means we'll be finished on De la Reyweg six months ahead of schedule.

In the coming period you can expect the following:

Fumes and dust
From windblown dust and exhaust fumes.

Noise
From excavators or pumps.

Different route
The De la Reyweg will be closed towards the Veluweplein.

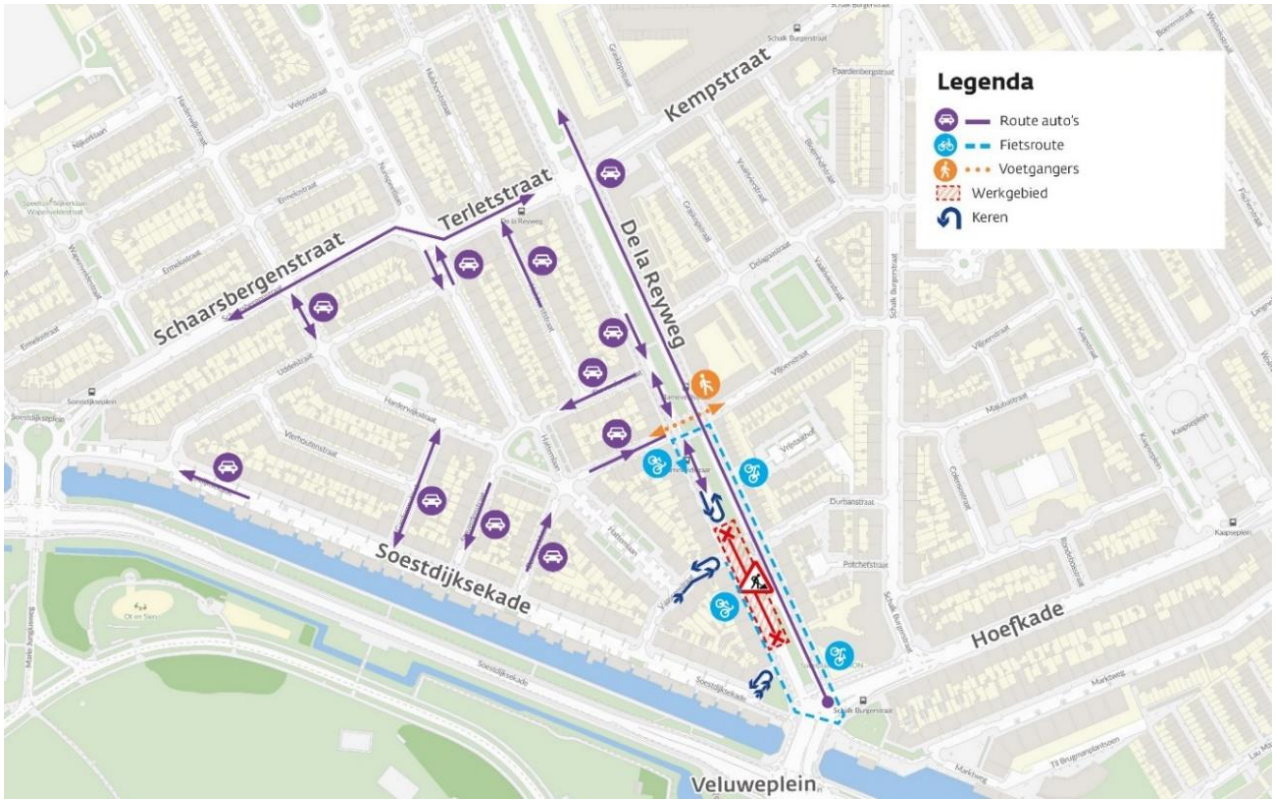

Road closure
The Vaassenstraat will remain a temporary dead end.

Bus 26 will take a different route until October
See HTM.nl.

A few things will stay the same until October:

- By car you'll have to take a different route towards the Veluweplein. The carriageway will be closed between the Barneveldstraat and the Veluweplein until the end of May.
- Bus 26 will continue to take a different route until October 2024. You can see the route the bus will be taking, and where you can get on and off, at www.htm.nl.
- Pavements and cycle paths will always remain clear, and homes and businesses will remain accessible, also for emergency and rescue services.
- Parking: you cannot park between the Barneveldstraat and the Veluweplein (towards the Veluweplein). The remaining part of De la Reyweg where we're not working will be available for parking again.
- Temporarily relocated disabled parking spaces between the Terletstraat and the Veluweplein will be put back to their original locations once the work on the De la Reyweg is fully completed in October.
- The underground waste containers in the dead-end side streets of the De la Reyweg will remain closed.
